

RVSM Specific Aircraft Training

Designed for Aircraft Maintenance Technicians

Course Outline and Syllabus

Objective

This program is designed to give aircraft maintenance technicians an in-depth understanding of their specific aircraft RVSM maintenance requirements. We will go through the Manufacturer's Service Bulletins and/or applicable Supplemental Type Certificates and discuss maintenance and inspection requirements for RVSM equipment, components and critical fuselage areas.

Aircraft Types:

- Astra/G-100
- Falcon 10/100
- Falcon 50
- Falcon 900B
- Falcon 900EX
- Westwind 1124/1124A

Classroom Size

20 students or less is preferred per class.

Course Duration

The course is a total of two (2) to four (4) hours depending on aircraft type.
