

# ***RVSM Familiarization Training***

## **Designed for Aircraft Maintenance Technicians**

### **Course Outline and Syllabus**

#### **Objective**

This program is designed to give aircraft maintenance technicians/engineers an in-depth understanding of today's current requirements for Reduced Vertical Separation Minimum (RVSM). A brief history of U.S. airspace separation rules combined with today's rules and regulations within the United States and around the world in order to allow the student a better understanding of the importance to properly maintain RVSM aircraft.

#### **Classroom Size**

20 students or less is preferred per class.

#### **Course Duration**

The course is a total of four (4) hours.
